

Connectivity Box YV-204B

Yolkvisual Conference Table Connectivity Box 2
AC Power, 2 RJ45, 2 HDMI, 1 VGA, 1 USB

Features

Cable cubby have jumper type and factor fixed type. The jumper type is the fixed power and the light current is the cable which is male to male. It will be hidden in the box if you don't

need to use. If you want to use, just open the cover then get the cables for connecting. As the fixed factor, it will be convenient for sales stock and easy for construction. This type panel is designed by a big loophole, which is easy to go through the wires. When you only want to use some of cables, you can take the cables go through the hole and then you can cover the lid, it will let the table look more beautiful. We have many size of this type.
